# ABOUT THE PLAYING

1-4-2-3-1

HOW&WHY?

WELLING TOWN FC

4-2-3-1

*It can look like that on Saturday. I didn't put any other names because they making lots of changes on these positions. I think they are looking for some more good players at the moment. Central backs and CDMs are really poor.*

# HOW THEY PLAY?

## SIMPLE & DIRECT

They trying to play on the ground from the goal but every single time they looking quickly for some opportunity on the wings. That's their strongest point. Wingers are looking for channels or long balls for free space behind the line. If it's not working they looking for striker to keep the ball or flick it to the cutting wingers. It's very simple but effective.

# WHY THEY PLAY LIKE THAT?

## SPEED ON THE WINGS

They wingers are really, really good. We need to focus to stop them on the game. Be close to them and don't let them run. Both of them are very quick and can go easily 1on1 with us. That's their biggest argument. The balls to the wings can go from everywhere. Not only from the middle of the park. Be aware!

# ABOUT WEAKNESSES

# DEFENCE

They doing lots of mistake in defence. Especially they have a problems with long balls. In the last couple of games their rivals had a chances after miskicks. Always go to the end! It's a chance for some gift from them. They trying to catch on the offside traps but they are disorganized lots of times. It's a big chance for our striker and wingers to find a good channel to the goal. Their left back and right back are really poor on 1on1. If it's a chance please try to pass them. Don't scare to go 1on1. The last thing - their goalkeeper is stick to the line. Every single delivery can be dangerous for them. It's easy to find some free space into the box.

# COUNTER ATTACKS

It look like half of the team is defending and half attacking. When they lose the ball lots of them are switched off. No reaction at all. It's a good moment to find a channel for our wingers or a striker. If we go forward in the good tempo we can score a goal easily. It can be our really strong argument in this game. Even if we collect the ball in the middle third. Don't forget about that!
